📍 Koblenz, Germany

Summary

Aspiring full-stack developer based in Koblenz, Germany, specializing in front-end development. Proven track record in building intuitive interfaces and efficient web applications using React, Angular, HTML, CSS, JavaScript, and TypeScript. Committed to optimization and continuous learning, ready to contribute to impactful projects.

Professional Experience

Frontend Developer, Hintbox 06/2023 – present | Koblenz, Germany

- Spearheaded React.js and Material-UI front-end development, yielding a 20% boost in user engagement through dynamic and reusable components.
- Implemented new features for superior user information management, fostering a 25% increase in user satisfaction and interaction.
- Achieved a 30% reduction in table load time between filters, significantly elevating application responsiveness and user experience.
- Optimized application performance, reducing load times by 20% and maintaining a code quality score of 95%.
- Collaborated efficiently in Agile processes, contributing to a 15% increase in project efficiency and on-time deliverables.

Frontend Developer, Deloitte 01/2023 – 04/2023 | Frankfurt, Germany

- Drove UI development for machine learning tools using Angular and React, boosting user interaction by 15%.
- Contributed to UI design enhancements, simplifying complexity to elevate user experience and streamline interactions.
- Optimized front-end code for a 25% increase in application performance and speed.

Software Analyst, Capgemini 04/2021 – 09/2022 | Bangalore, India

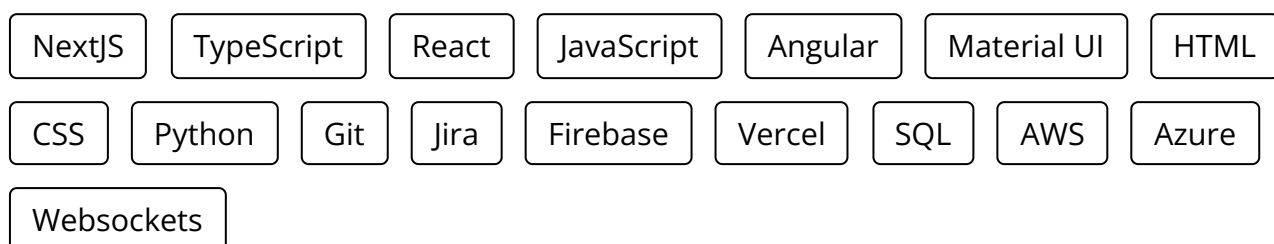

- Led front-end development for Amgen's global web portal, resulting in a 20% improvement in site speed, enhancing user experience and satisfaction. Implemented performance optimizations using ReactJS, HTML, CSS, JavaScript, and Bootstrap with Sitecore CMS (ver. 10.1).
- Developed an internal library resulting in a 30% reduction in development time for subsequent projects.
- Completed multiple proofs-of-concepts (POCs), demonstrating a 25% increase in project innovation and efficiency.
- Led the transition from jQuery to React, resulting in a 40% enhancement in code maintainability and a 20% reduction in bug-related issues.

Web Developer Intern, Softway 07/2019 – 07/2019 | Bangalore, India

Worked as a web developer intern on a project for online catering services. My tasks were:

- Working as a back-end developer using PHP to maintain website integrity, security, and efficiency.
- Developing a chatbot using Dialogflow.

Skills

Education

Masters of Science (Web and Data Science), 10/2022 – Present | Koblenz, Germany
University of Koblenz
• *Currently enrolled*

Bachelor of Technology (Computer Science), 08/2016 – 09/2020 | Kurukshetra, India
Kurukshetra University
• *Graduated with First Division*

Projects

Aerospace Dashboard [↗](#)

- Developed a comprehensive spacecraft data dashboard with direct retrieval of mock data
 - Utilized REST API for static data retrieval
 - Implemented WebSocket for real-time updates at 500ms intervals
 - Designed and integrated an interactive table and line graph for effective data representation
 - Enhanced user experience by enabling actions as needed
 - Provided users with the flexibility to choose between different views
- Technologies Used: ReactJS, Typescript, MaterialUI, Netlify, Websockets.

LifeOfSushant [↗](#)

07/2023 – present

LifeOfSushant is an ongoing personal blog website where I curate and share my life experiences, tech insights, and interests.

- Created and curated by a passionate software developer with a flair for writing.
- Platform designed to offer diverse content, including technology-related topics and personal reflections.
- Aim to engage and connect with a like-minded audience.
- Provides valuable insights and stories to inspire and entertain readers.

Technologies Used: NextJS, TailwingCSS, Vercel Cloud.

AmaCart [↗](#)

06/2022

AmaCart is an e-commerce website that offers a seamless and user-friendly shopping experience for customers.

- This enables users to explore a wide range of products, add items to their cart, and conveniently place orders.
- I implemented an intuitive login system for users and an admin interface for store owners to manage their inventory effortlessly.

Technologies Used: React JS, Google Firebase, Redux, CSS, HTML.

Social Network Website

04/2021 – 06/2021

Developed a social networking website that allows users to connect and socialise. Here, users can:

- Edit and update user data.
- Chat, post their thoughts, and share images.
- Network and join different groups. Technologies Used: Mongo DB, Express Js, React Js, Node Js

Technologies Used : Mongo DB, Express Js, React Js, Node Js

Certification and Courses

Certified SAFe® 5 Practitioner, Safe Agile 07/2022

Introduction to Cloud Computing, Coursera 12/2021

Agile Software Development, Coursera 11/2021

Front-End Web UI Frameworks and Tools, Coursera 05/2021

Azure AI Fundamentals, Microsoft 01/2021
